PROFESSIONAL SUMMARY
Dedicated and results-driven Data Scientist with 2+ years of experience in Natural Language Processing, Machine Learning, and Pre

EDUCATION
Bachelor of Science in Computer Science & Data Science
State University | Magna Cum Laude | GPA: 3.85 / 4.0
Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Linear Algebra, Statistical Inference, Algori

TECHNICAL SKILLS
- Programming Languages: Python, R, SQL, Java, Bash
- Machine Learning & AI: scikit-learn, TensorFlow, PyTorch, XGBoost, Random Forest, Decision Trees, K-Means, Neural Networks,
- Data Science & Analytics: Pandas, NumPy, SciPy, Matplotlib, Seaborn, Plotly, EDA, Feature Engineering, Data Cleaning, Statistica
- Databases: PostgreSQL, MySQL, MongoDB
- DevOps & Tools: Git, GitHub, Docker, Jupyter Notebook, Google Colab, Linux, VS Code
- Soft Skills: Problem Solving, Teamwork, Technical Writing, Communication, Agile

PROFESSIONAL EXPERIENCE
Data Science Intern | TechCorp Analytics | Jun 2023 - Aug 2023
- Engineered a Sentiment Analysis classification pipeline using BERT and TF-IDF, improving accuracy by 14% over baseline.
- Conducted exploratory data analysis (EDA) across 500,000+ consumer records using Pandas, NumPy, and Plotly dashboards.
- Developed an automated customer churn forecasting model with XGBoost and scikit-learn, achieving an F1-score of 0.88.
- Designed and implemented clean SQL queries on PostgreSQL data warehouse to extract telemetry metrics for executive reporting.

ACADEMIC PROJECTS
ATS Resume Keyword Matcher & NLP Analyzer
- Built an intelligent resume-to-job matching engine utilizing TF-IDF n-gram vectorization and Cosine Similarity in Python.
- Extracted technical domain skills using custom punctuation-safe regular expressions and evaluated candidates with Plotly visualiza

COVID-19 Epidemiological Dashboard
- Aggregated international health datasets using Pandas; built interactive time-series forecasting models with Linear Regression.
